**RE: BICSI Continuing Education Credits (CECs) for
Unique Fire Stop – Factory Certification Training**

Thank you for your interest in supporting the professional development of individuals in the Information Transport Systems (ITS) Industry. BICSI will recognize the following Continuing Education Credits (CECs) for successful completion of the referenced courses (see attached listing).

RCDD	NTS	OSP	WD	ESS	RES	Installer	Technician	Certified Trainer
2						2	2	2

These credits will be posted on the BICSI website at https://www.bicsi.org/ams/outside_vendor.aspx and will be valid for a (2) two-year term effective from the date of this letter or until the content and/or duration of the course changes, whichever comes first. **It is the responsibility of the course provider to notify BICSI of any course changes and to request a revised CEC review.**

You may market these courses as recognized by BICSI for CECs. However, the BICSI name must only be used in a manner that avoids confusion or possible misrepresentation that the course is approved or endorsed by BICSI. Your organization is permitted to identify BICSI CECs in its course marketing material in the following manner:

“Effective December 24, 2009, BICSI recognizes Unique Fire Stop – Factory Certification training for the following BICSI Continuing Education Credits (CECs).”

A signed certificate must be issued to each individual who completes the curriculum. The certificate must include the completion date of the course, the proper course title, and the number of CECs approved. It should be made clear to your course attendees that BICSI CECs are issued ONLY to BICSI credential holders.

For questions or appeal concerning the number of credits, please contact Lois Rosa at 813.903.4727.

Sincerely,

Mark Kazes
